

Easy Curved Flying Geese

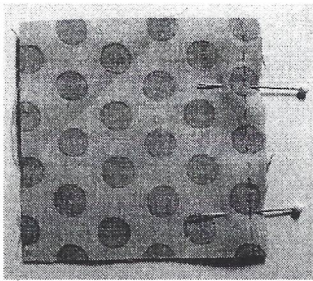

Choose a background fabric and cut two 3" squares.

Choose a geese fabric and cut one 3" x 5-1/2" rectangle.

Fold the rectangle in half lengthwise with right side out, and place it on one 3" square right sides together. The fold should be at the top.

Then place the other 3" square right side down on the folded rectangle. Pin together down the right side, and sew 1/4" seam.

Open the pieces so the goose spreads out and finger press the seam open. Press from the front. Tack down the loose points of the geese. You may leave the sides open, or fold over and sew for a curved look.
